

Title

FOREST MANAGEMENT PLANNING IN CANADA

Model Forest

Western Newfoundland Model Forest

From

March 2003

To**Keywords**

ACC, public participation, forest management plans, conflict resolution, environmental assessment

Objective

To examine the forest management practices in the provinces of BC, Alberta, Manitoba, Ontario, NB, and NL

Description

The following report provides details of the forest management planning processes for the provinces of BC, Ontario, Alberta, Manitoba, NB and NL. This report does not seek to compare processes, nor does it seek to evaluate merits of faults with any of the provinces approaches to forest management. This report attempts to provide a non biased and factual account of each provinces current forest management planning process.
